17c each. 8.4 Monsignor (Vilmorin 1907) 24 inches. Late. The violet mys of vety crimson falls, whose very dark veinings add dignity to the whole.

Massive and imposing. at 15c each. 8.1 Pare de Neuilly (Vezdier 1910) 28

inches. Midsenson. S. & F. a very dark navy blue of reddish hue. Large flowers of perfect form carried well. Most floriferous. I root, 35c; 5 at 33c each; 25 at 23c each.

8.3 Archeveque (Vilmorin 1911) 27 inches. Early, S. deep purple violet, F: deep velvely blackish purple. Bloom pointed like a mitre, 1 root, 60c; 5 at 50c each: 25 at

8.3 Seminole (Farr 1920) 28 inches. rich velvety crimson; brilliant orange beard." Farr.

Single root, \$1.75 each. 8.0 Tom Tit (Bliss 1919) 18 inches. Flowers small, three or four on a stem, deep self violet. F. almost

Single root, \$2.00 each. 8.6 Edouard Michel (Verdier 1904) 36 inches. Late. S. & F. unusual shade of intense reddish purple. Single root, \$2.00 each.

8.7 Opera (Vilmorin 1916) 28 inches. Early. S. bright reddish lilac; deep velvety purple lilac. Beard yel Single root, \$2.50 each.

9.6 Lent A. Williamson (Williamson 1916) 42 inches. Early. S. very broad, soft campanula violet; F. very large velvety royal purple. Brilliant gold beard. Massive in growth, stalk and flower, always dependable.

Highest ballot. Single root, \$2.50 each. 8.5 Medrano (Vilmorin 1920) 26 inches. Early. S. & F. a beautiful dark smoky claret color, Very unusual

effect, large flowers. Single root, \$4.50 each. 9.3 Souvenir de Mme. Gaudichau (Millet 1914) 42 inches. Early. S. & Single root, \$5,00 each.

F. rich deep purple bicolor. Mr. Wister writes: "Not only Millet's greatest variety, but is one of the richest in coloring of all Irises." Large and free blooming. the same time." Vilmorin. Single root, \$8.00 each. 8.8 Halo (Yeld 1917). Single root, \$7.00 each.

8.9 Alcazar (Vilmorin 1910). Single root, 50e each.

Single root, \$4.50 each.
E. H. Jenkins (Bliss 1919). Dorothy K. Williamson (Williamson 1916). Single root, \$3,00 each. Single root, \$6.00 each.

6.5 Gertrude (Peter on 1907) 34 inches. Earliest, S. & F. both uniform shade of clear violet thie. Very effective in mass planting and for house decoration. Its folinge is desirable and distinct. A dependable free bloomer. I root, 25c; 5 at 15c each; 25 at

9.5 Princess Beatrice (Barr) 46 inches. Midseason. S. & F. delicate lavender with blue reflections. A pastel shade much sought for, with broad This is a selected form of Pallida Dalmatica, known in gurdens for three hundred years. I root, 70c; 5 it 58c each; 25 at

8.0 Sarpedon (pallita Yeld 1914) 36 inches. Midseaton, S light violet blue. With bluad oblong slightly darker falls. Ettra large flower. Single root, \$1.00 each.

8.1 Neplune (pallida Yeld 1916) 38 inches. Midseason, S. bright pale blue; F. rich dark purple blue; the tall branching hebit sets off nobly its large flowers and wide spread falls. Single root, \$1.75.

8.7 Crusader (pallida Foster 1913) 42 inches. Midseason. S. a light shade and F. a deep shade of violet blue. Beard orange yellow. "One of the most beautiful of all Iris." Single root, \$2.00 each.

9.1 Lord of June (pallida Yeld 1911) 40 inches. Midsenson. S. lavender blue; F. rich violet blue. A very strong grower with massive flowers of immense size. Single root, \$2.00 each.

8.1 Raffet (Vilmozin 1920) 28 inches. Late, S. & F. uniform dark blue falls striped at base with white. Yellow beard. Single root, \$3,00 each.

8.6 Cluny (pallida Vilmorin 1920) 38 inches. Early, S. pale lilac blue; F. slightly deeper with brown veinings at the base. Magnificent variety with flowers of the largest size. Single root, \$3,00 each. 8.3 Benbow (Bliss 1917) 36 inches.

Midseason. S. & F. deep violet blue. Very large sized blooms on erect well branched stems. Single root, \$3.50 each.

9.4 Ballerine (pallida Vilmorin 1920) 48 inches. Early, S. light violet blue, F. deeper, Very fragrant. Single blooms, often five inches long. Wide rounded standards waved at the edges. Single root, \$5.00 each

8.5 Prospero (Yeld 1920) 48 inches. "S. pale lavender flushed with yellow at base. F. deep reddish purple with lighter shadings at margin." Wallace.

Mrs. Walter Brewster (Vilmorin 1922) 28 inches. "S. lavender blue; F. aniline blue. Often six blooms at

12c each.

7.5 Queen Alexandra (Barz 1910) 30 inches. Late. S. rose lavender suf-fused with faun; F. lilac reticulated at base with bronze. Beard yellow. Unusual shade, A very attractive 1 root, 25c; 5 at 13c each; 25 at

3,2 Lohengrin (Goos & Koenemann 1910) 33 inches, Midseason, S. & F. pink silver mauve, shading nearly to white. Has very heavy buds opening into large flowers borne on sturdy 1 root, 25c; 5 at 16c each; 25 at

.6 Isoline (Vilmorin 1904) 36 inches. Late. S. opalescent lilac 3 inches long, surmounting an apron of 334bination, beautiful, artistic and

1 root, 40c; 5 at 37c each; 25 at 27c each.

3 Dejazet (Vilmorin 1914) 24 inches. Late, S. bronze rose with golden sheen: F. reddish violet, the whole beautifully blended. Large broad flower. Single root, \$2.75.

Tureo (pallida Vilmorin 1921) 30 inches. Late. 'S. lilac rose; F. deep yellow washed with blue. Coloz very fresh." Vilmorin. Not grown here long enough to be properly rated, Single root, \$3.50 each.

5 Molicre (Vilmorin 1920) 28 inches. Early. S. dark violet, F. darker violet veined brown at haft. Yellow beard. Single root, \$4.00 each.

1 Magnifica (Vilmorin 1920) 44 inches. Midseason. S. light violet blue: F. dark reddish violet. A fine strong plant with branching stems. The flowers are extraordinarily large, 6 inches long and sweet scented. This is the true strong growing kind, Single root, \$4.50 ench.

9.0 Queen Caterina (pallida Sturtevant 1918) 40 inches, Midseason, Pale lavender violet, with vellow beard, white haft veined with bronze. A strong grower and hardy where Caterina fails. Single root, \$5.00 each.

.5 Sweet Lavender (Bliss 1919) 39 inches. S. pale lavender; F. horizontal, very broad, widely expanded and of a deeper rose lavender. One of the finest and most distinct of Bliss' seedlings. Single root, \$7,00 each.

7.8 Clematis (Bliss 1917). Single root, \$2.00 each.

3.4 Troost (Denis 1908). Single root, \$4.00 each.

8.5 Dream (Stuttevant 1918). Single root, \$8.00 each. 9.0 Leverrier (Denis 1917). Single root, \$9.00 each.

9.2 Asia (Yeld 1920). Single root, \$17.50 each

8.3 Prosper Laugier (Verdier 1914) 32 inches. Midseason. S. fiery bronze; F. velvery ruby purple, like a pansy bloom. This new "bronze" variety out lasses them all in being a clear well-defined, striking combination in a complete harmony of correctly blooming sort. 1 root, 35c: 5 at 32c each; 25 at

22c each. 7.8 Eldozado (Vilmorin 1910) 30 inches. Midseason. S. fiery opal-escent. F. old gold silhouetted with burnt purple, a totally distinct harmony of striking hues, perfectly blended. Has weak stems. l root, 40c; 5 at 34c each; 25 at 24c each.

lris King (Goos & Koenemann 1907) 28 inches. Late. S. old gold; t. very large velvely maroon edged with gold. Well named "The King of the bis." root, 40c; 5 at 36c each; 25 at

26c each. Ounker Lady (Farr 1909) 38 inches. S. smoky lavender with yellow shildings; F. ageratum-blue and old gold with yellow stigmas and beard. Strong grower, Its distinguishing name is most suitable. root, 45c; 5 at 38c each; 25 at

W. J. Fryer (Fryer 1917) 30 inches. Late. S. large bright yellow; F. large deep maroon with narrow vellow border center overshadowed with violet. One of Fryer's best seedlings. Single root, \$2,00,

8.5 Grevin (Vilmorin 1920) 26 inches. Late. S. Violet with yellow shading; dark violet with bright yellow Single root, \$3.00.

Arsace (Millet 1914) 24 inches. "S and F. grayish white to flame colored blue, bordered with mauve." Wister. Single root, \$3.50 each.

7.9 Mady Carriere (Millet) 30 inches. S. pale plumbago blue; F. ageratum blue, shading to rich vellow at base, An improved Ounker Lady. Single root, \$4,00 each.

Ambassadeur (Vilmorin 1920) 42 flower that should have a great future. The standards are of a fascinaling smoky puzple, while the orange bearded falls are velvety purple maroon. Quite the lris of the year Award of merit, Royal Hozticultural Society 1921." highest in the ballot. Single root, \$4.00.

In the brief descriptions given, "S" indicates the erect petals or standards, "F" the drooping petals or falls. The inches designate the height

Rend down the columns for all of the same A ballst by twenty-three selected Iris experts of America has been made by the American Iris Society and their findr, on a rating of len, is placed before each description. The 7.6 Sherwin-Wright (Kohankie 1915) 24 inches. Early. S. & F. splendid golden vellow flowers without shad ing or markings. Taller than Mrs Neubronner and the blooms are larger and distributed farther apart. Multiplies rapidly and is most satisfactory. Deserves a higher ballot.

1 root, 25c; 5 at 18c each; 25 at

'.9 Lozeley (Goos & Koenemann 1909) 30 inches. Early. S. breast of a wild canary; F. creamy white with purple reticulations blending into a velvety purple mass near the ends. which are marginated with deep canary. The best of this type and the most prolific. I zoot, 35c; 5 at 30c each; 25 at

The Inca (Farr 1922) 24 inches vellow: F. velvety dark plum edged, golden band thru center; golden reticulations at base. Improved Pfauenauge." Farr. Not voted on yel. Single root, \$1.50.

6.6 Afterglow (Stuztevant 1918) 36 inches. Midsenson. "A soft grayish lavender shading to a rich pinard yelow thru the center, a flower of loose prillida form; stalk well branched, growth strong." Sturtevant. Single root, \$1.75.

8 Knysna (Bliss 1917) 33 inches, Midseason. 'The long arching standards are clear deep yellow, the falls a deep velvety red brown. Exceedingly free-blooming and a vigorous grower. The finest yellow variety in cultivation today." Wallace.

Trianon (Vilmorin 1921) 28 inchei. Late. "S. yellow: F. yellow with bluish reflections. Color delicate and new. A vigorous grower and very floriferous." Vilmorin, Not grown here long enough to be properly Single root, \$3.50.

5.8 Shekinah (Sturtevant 1918) 36 inclies. Midseason. "A pale lemon vellow deepening thru the center to the orange of the beard. The first real vellow of pullida growth; s strong grower." Sturtevant. Single root, \$5.00.

originator's name and the year the variety war introduced are in parenthesis.

Of the sixty-four Iris listed herewith, twenty five were raied at 8.5 or more, the next Iwenty one run between 8.1 and 8.4 inclusive, and the remaining eighteen are 8,0 or below. Thirty five virtelies have been introduced since 1916 and 1915.

8.4 Rhein Nixe (Goos & Koenemann 1910) 36 inches, Midsenson, S. very large and pure white; F. rasp-berry purple edged white. A most vigorous grower, always dependable. The only one of the white and nur ple bicolors worthy of being kept in our list. Originating on the Rhine, its jaunty air may have suggested its 1 root, 35c; 5 at 31c each; 25 at

3.0 Fairy (Kennicott 1905) 34 inches. Midsenson, S. & F. resemble sunkissed snow outlined by the faint azuze of the sky. The crests of the stigmas are a most delicate lake blue with an abundant the delicate perfume suggestive of the wood nymph. The tallest approximate white. Single root, 40c; 5 at 35c each; 25

7.9 Mrs. Fryer (Fryer 1917) 32 inches. Midseason. "S. white shaded helio-trope; F. purple crimson, bordezed a lighter shade, white veins from center to base. Oninge beard." Fryer.

1 root, 50c; 5 at 39c each; 25 at

White Knight (Saunders 1916) 20 inches. Late. S. & F. absolutely snow white without markings, finely formed, delicately sweet scented, and a very vigorous grower. It fulfills in every way its worthy name. l root, 90c; 5 at 73c each; 25 at

8.3 La Neige (Vezdier 1912) 18 inches. Late. S. & F. a puze glistening waxy white. The falls are carried stiffly horizontal. Does not multiply rapidly. Single root, \$1.75.

8.2 Tristram (Bliss 1919) 27 inches. "S. of the clearest white; F. deep rich purple, richly reticulated at haft." Single root, \$2.50 each.

7.4 Mine. Cherenii (Lemon 1844) 36 and elegantly frilled lobelia blue: F. white bordered blue. Style arms bright blue. Many new frilled varie ties continue to be intraduced, bu this one remains a favorite. Keeps I root, 25c; 5 at 12c each; 25 at

.8 Mary Garden (Farr 1913) 28 inches Late. "S. Pale yellow flushed pale lavender. F. creamy white minutely dotted and veined majoan: stigmas clear yellow." Farr. An elegant flower of distinct, iridescent effect. 1 zoot, 30c: 5 at 26c each: 25 at 18c each.

9 Parisiana (Vilmozin 1911) 30 inches Early. S. lavender pink mottled all over; F. creamy white center very heavily bordered with lavender pink. A most striking and unusual but highly pleasing effect. L 2001 30c: 5 at 28c each: 25 at 19c each.

1 Ma Mie (Cayeux 1906) 38 inches. Midseason. S. & F. pure white with ruffled border delicately penciled blue when closely of erved. An improved Madame Chereau. Style arms blue. I root, 80c; 5 at 63c each; 25 at 53c each.

4 Anna Farr (Fair 1913) 30 inches. Midseason. "S. white lightly bor-dezed pale blue; F. puze white with pale blue markings at the base; immense flower with very large petals of great substance: bozizontal falls producing an orchid-like effect. Distinct." Farr. Single root, \$2.50.

.3 Dimity (Bliss 1919) 36 inches. Midsenson. "A strong growing variety with tall branching spikes. S. white slightly veined and pencilled mauve. F. wide, long and spreading of fine shape faintly veined with lavender towards the upper half. Most distinct." Wallace. Single root, \$5.00.

Tabulating Varieties

In making a division by color, we first separated the decided chades, like purple, lilac, yetlow and white. So many desirable vallows and smoke or bronze sorir appeared that all not rently yellow were put together in a class as branze. For the same reason the lilac shades were divided into blue litac and pink lilac. Finally there not included with the others, has ing a light colored ground variously mattled or penciled, for want of a better name were called Triffed." The universally known Madame Chereau belongs to this clars.

When the standards vary from the falls the bloom is classified according to the standards A preference is given to those whore rlandards and lalls are of a general rimilar thade, or when marred they best carry out a decorative color scheme, though some representatives of twocolor effects, tike Rhein Nixe, are retained.

In each of there reven eotor divisions we in riall the absolutely unarsaitable varieties. Each new condidate must demonstrate its individual merit ar a povelty or its experiority over a kind now on the list to be necepted. The favorable Irails considered are, good folinge, strong, strnight rient, heedom of blooming, size of single flower, lasting qualities, fragrance, being fart multipliers and having hardy constitutions. Elimination

Take Iriz Cordelia, a choice, rich purple of the rame thade and effect at Monsignor; when they are blooming ride by ride people always preler Monsignor. Wa therefore, alter growing Cordelin for five years, sold out our complete

The fire of frilled sorts is culled from thirty different forms, all pleasing but not errential. A delicate pastet shade like Cherubim soon blegeher in the field to white and giver way to Lohengrin, which is more enduring.

Free Blooming Strain Developed

The fact of our murketing our blooms for an numy years has made us lay great emphasis on growing only those sorts that are bloom producers. Also for propagating purposes ne carefully select free blooming plants of the particular variety to be divided.
